DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to an iso bearing for a circuit breaker, classified in class 335, subclass 172.
 - II. Claims 11-16, drawn to a rotor assembly for a circuit breaker, classified in class 335, subclass 16.
 - III. Claims 17-21, drawn to a multiphase circuit breaker housing, classified in class 335, subclass 202.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an iso bearing not used with the rotor of II or in the housing of III, invention II has separate utility such a rotor not used with the iso bearing of I or in the housing of III, invention III has separate utility such as an multiphase housing not using the iso bearing of I or the rotor of II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2832

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
